

# OpenCircle Litepaper & Transparency Log

---

## 1. Introduction & Mission

OpenCircle is a next-generation, radically open DAO on Polygon where **anyone**—from total crypto newcomers to experienced builders—can own, earn, and shape a transparent community. We eliminate ads and gatekeepers, rewarding genuine contribution and giving direct support to both the project and its founder.

---

## 2. The Problem

Most digital creators and contributors are trapped by ad-driven platforms or opaque web3 DAOs, where value goes to algorithms or insiders—not the community. Newcomers face technical barriers and hidden rules. Founders often struggle quietly to sustain their work.

---

## 3. What Makes OpenCircle Different

- **Onboarding for Everyone:** Step-by-step, human-guided help for web2 users and crypto beginners. Never coded? Never held a wallet? We walk you through it.
  - **No Ads. No Algorithms.** All rewards, voting, and community decisions come from peers, not clicks or hype.
  - **End-to-End Transparency:** DAO treasury, founder support, and every OCL distribution are logged and visible in real-time.
  - **Open Playbook for All:** Our onboarding guides, claim flows, Discord/FAQ templates, and transparency logs are published—free for anyone to copy or remix.
  - **Immediate Participation & Reward:** Every joiner, helper, or early contributor receives OCL and a direct line into community governance and proposals.
- 

## 4. Token Utility & DAO Structure

- **Token:** \$OCL (Polygon, 18 decimals)
- **Governance:** 1 OCL = 1 vote. Ownership and direction by all, not a select few.

- **Claimable, Not Buy-Only:** Newcomers and contributors can earn OCL without insider access; no token sales or hurdles upfront.
  - **DAO Actions:**
    - Proposals and voting via [Snapshot](#)
    - Live public Notion logs for every distribution, donation, or reward
    - All contracts and rules are open source and auditable
- 

## 5. Funding & Support Needs

**OpenCircle is 100% publicly funded—for both DAO operations and founder survival.**

— All support (including founder's personal needs) is transparently tracked in our log.

— Supporters can donate crypto (Polygon: MATIC/USDC/ETH) or via Buy Me A Coffee—every supporter is credited and thanked (unless they request privacy).

---

## 6. Roadmap (Next 30–60 Days)

- Onboard 50+ real users from all skill levels using the open playbook
  - Maintain daily/frequent transparency updates: new voters, supporters, and DAO actions
  - Launch community bounties for onboarding, guides, and moderation
  - Apply for grants/grow external partnerships (with every ask/funding result logged live)
  - Share all operational guides/resources for other DAOs to fork and build on
- 

## 7. How to Join & Shape the DAO

1. **Read the Onboarding Guide:** [Get Started](#)
  2. **Claim OCL:** Join Discord (#onboarding) or email us—step-by-step, zero experience required.
  3. **Participate:** Vote, propose, support others, get your reward logged transparently.
  4. **Contribute to the Playbook:** Suggest changes, fork our guides, or improve the system—OpenCircle is built to be shared.
-

## Transparency & Funding Log\*

Your support keeps both OpenCircle and its founder alive—personal needs and real community goods deserve open funding. Thank you for making it possible.

*\*Log will list only as much detail as contributors are comfortable with for privacy.*
